ISO/IEC JTC 1/SC 2/WG 2

Universal Multiple-Octet Coded Character Set (UCS) - ISO/IEC 10646

Secretariat: ANSI

Title:	**Revised Proposal on Tibetan BrdaRten Character Encoding for ISO/IEC 10646 in BMP**
Precede:	**WG2 N2558**
Source:	**China National Body**
Action:	**To Discuss at WG2 #44**
Distribution:	**SC2/WG2 Experts**

1. Introduction

The written form of Tibetan language could be regarded as a horizontal stream of basic Tibetan characters and BrdaRten characters. The BrdaRten characters are vertically pre-composed basic Tibetan characters. In this document, the proposed BrdaRten characters are limited to those stably structured, widely and frequently used ones with high usage coverage to modern Tibetan written language. This document proposes **962** BrdaRten characters, compared with the precede document N2558, only a very few characters are removed or added.

The 192 Tibetan characters encoded in ISO/IEC 10646, are Tibetan letters, Sanskrit letters, punctuations, astronomy and special symbols. They enable to represent thousands Tibetan characters using dynamic combing methods with minimum code points. However, this encoding scheme is not compatible with traditional education, publication and electronic desktop publishing systems. Meanwhile, because of the technical reasons, such as description of glyph, systems implementation and application software

development, it seems still quite difficult to properly solve the problems with combining approach for Tibetan information interchange and processing.

1) The biggest difficulty for Tibetan information processing is the vertical composition of Tibetan characters. After the composition, each component would be changed greatly in shape and size, especially the vertical composition of the characters would reach to multiple layers where each letter requires different spans in height and width at the same layer that is quite hard to be dealt with. Up to now, there is no report showing any system platform has satisfactorily implemented Tibetan processing system using dynamic combining method.

2) In the implementation level 1 of ISO/IEC 10646, one code corresponds one character but one Tibetan BrdaRten character needs several codes to represent with varying length which is a big block to the implementation of Tibetan system. In practical applications, the bilingual processing such as Tibetan-Chinese or Tibetan-English at the same level of implementation with fixed length is an underlying requirement of Tibetan users.

Since 1990s, from DOS to Windows, both domestic and oversea applications have been using basic Tibetan character set and Tibetan BrdaRten character set at implementation level 1. For example, the Tibetan systems in use implemented by Founder, Huaguang, and Tongyuan are based on basic Tibetan characters plus BrdaRten characters. The Founder encoding system for Tibetan has become the de-facto industry code page standard for Tibetan information interchange and processing in China and even outside of China.

Tibetan BrdaRten characters are structure-stable characters widely used in education, publication, classical documentation including Tibetan medicine. The electronic data consisting of Basic Tibetan characters and BrdaRten characters are estimated beyond billions. Once the Tibetan BrdaRten characters are encoded in BMP, many current systems supporting ISO/IEC10646 will enable Tibetan processing without major modification. Therefore, the international standard Tibetan BrdaRten characters will speed up the standardization and digitalization of Tibetan language, keep the consistency of implementation level of Tibetan and other scripts, develop the Tibetan culture and make the Tibetan culture resources shared by the world.

2. Background of the proposal

Since 1993, every effort has been made by Tibetan experts in deep study on researchers' study on the history, current usage, classics, modern publications, structure characteristics of Tibetan script. With the above outcome, referred to statistics of usage frequency of Tibetan characters, the BrdaRten encoding principle is formed and updated for this proposal.

We had handed in our first proposal at the WG43 conference, Tokyo, Japan. (Refer to N2558). According to the resolution of the meeting, we organized experts from universities, institutes, research center, publishing house, IT vendors, standard working group, government committees from Tibet, Gansu, Qinghai as well as Beijing to further discuss, expound, and revise the document, come up with the second edition of BrdaRten character set, which includes 962 characters.

3. Principle

1) The BrdaRten character set is the extension of the encoded basic Tibetan character set.
2) The BrdaRten character set plus the basic Tibetan characters shall be able to represent and interchange all of the information in modern Tibetan language to meet the requirement of modern Tibetan information processing.
3) The ordering of the BrdaRten characters should be based on the ordering of basic character set.
4) The BrdaRten characters coding scheme must be feasible and affordable to implement.

4. Technical facts

1) The BrdaRten characters coverage to the modern Tibetan documents is 100%.
2) The ordering of Tibetan BrdaRten characters is based on the "base characters" with consideration of Tibetan writing rule, structure features and grammar discipline.
3) Each BrdaRten character is represented by one code instead of several codes. This makes Tibetan script same as many other scripts in implementation level and facilitates the Tibetan information processing.

5. Conclusion

After serious discussion and analysis by Tibetan linguists, encoding experts and software developers in China, including all Tibetan language experts and users in the Tibetan language area are in favor to establish a national and international standard Tibetan BrdaRten character set to meet the requirement of Tibetan information processing. "Basic Tibetan Characters plus BrdaRten" is our serious choice for Tibetan IT, we hope and believe it could be respected in ISO community. BrdaRten character encoding in BMP would be a significant step towards unified and normative manner of Tibetan information processing in the world.

REVISED PROPOSAL SUMMARY FORM TO ACCOMPANY SUBMISSIONS
FOR ADDITIONS TO THE REPERTOIRE OF ISO/IEC 10646

A.   Administrative

1. **Title : Tibetan BrdaRten Character**
2. Requester's name : China
3. Requester Type (Member body/Liaison/individual contribution): Member body
4. Submission date : 2003-09-18
5. Requester's reference (if applicable) :
6. (Choose one of the following:):
This is a complete proposal:
or, More information will be provided later: Yes

B. Technical - General

1. (Choose one of the following:):
a. This proposal is for a new script (set of characters) :   Yes
Proposed name of script : Tibetan BrdaRten Character
b. The proposal is for addition of character(s) to an existing block: No
Name of the existing block:
2. Number of characters in proposal :   962
3. Proposed category (see section   ,Character Categories):   A
4.Proposed Level of implementation (1, 2 or 3)(see clause 14, ISO/IEC 10646/IEC 10646-1: 2000):   1
5.Is a repertoire including character names provided?   Yes
a. If yes, are the names in accordance with the 'character naming guideline
in Annex L of ISO/IEC 10646-1:2000?   Yes (will provide)
b. Are the character shapes attached in a legible form suitable for review?   Yes
6. Who will provide the appropriate computerized font(ordered preference: True Type, or PostScript format) for
publishing the standard?   Tibetan Language Research and Developing Committee, Tibet University
If available now, identify source(s) for the font (including address, e-mail, ftp-site, etc) and indicate the tools
used: Tibetan Autonomous Region Guiding Committee Office of Tibetan, Tibet University   ftp://210.41.7.19
7. References:
a. Are references (to other character sets, dictionaries, descriptive texts etc.) provided?   Yes(will provide)
b. Are published examples of use(such as samples from newspapers, magazines, or other sources)
of use of proposed characters attached?   Yes(will provide)
8. Special encoding issues:
Does the proposal address other aspects of character data processing (if applicable) such as input,
presentation, sorting, indexing, transliteration etc. (if yes please enclose information)
                                                                                          No
9.Additional Information:
Submitters are invited to provide any additional information about Properties of the proposal Character(s) or Script
that will assist in correct understanding of and correct linguistic processing of the proposed character(s) or script.
xamples of such properties are: Casting information, Numeric information, Currency information, Display behaviour
Enformation such as line breaks, widths etc. Combining behaviour , Default Collection behaviour, relevance in Mark
Up contexts, Compatibility equivalence and other Unicode normalization related information.
See the Unicode standard at http://www.unicode.org for such information on other scripts. Also see
http://www.unicode.org/Public/UNIDATA/UnicodeCharacterDatabase.html and associated Unicode Technical Reports
for information needed for consideration by the Unicode Committee for inclusion in the Unicode Standard.

c. Technical-Justification

1. Has this proposal for addition of character(s) been submitted before? No

If YES explain _____

2. Has contact been made to members of the user community (for example: National Body,

user groups of the script or characters, other experts, etc.)? Yes

If YES, with whom? National Body

If YES, available relevant documents: Info will be provide

3. Information on the user community for the proposed characters (for example:

size, demographics, information technology use ,or publishing use)is included? Yes

Reference Yes (will provide)

4. The context of use for the proposed characters (type of use; common or rare) Common

Reference: Info will be provide

5. Are the proposed characters in current use by the user community? Yes

If YES, where? Reference: Worldwide

6. After giving due considerations to the principles in *Principles and Procedures document* (a WG 2 standing

document)must the proposed characters be entirely in the BMP? Yes

If YES, is a rationale provided?

If YES, reference:

7. Should the proposed characters be kept together in a contiguous range (rather than being scattered)? Yes

8. Can any of the proposed characters be considered a presentation form of an

existing character or character sequence? Yes

If YES, is a rationale for its inclusion provided?

If YES, reference:

9. Can any of the proposed characters be encoded using a composed character sequence of either

existing characters or other proposed characters? Yes

If YES,is a rationale for its inclusion provided?

If YES,reference:

10. Can any of the proposed character(s) be considered to be similar (in appearance

or function) to an existing character? No

If YES,is a rationale for its inclusion provided?

If YES,reference:

11.Does the proposal include use of combining characters and/or use of composite sequences

(see clauses 4.12 and 4.14 in ISI/IEC 10646-1:2000)? No

If YES, is a rationale for such use provided?

If YES, reference:

Is a list of composite sequences and their corresponding glyph images (graphic symbols)

provided? Yes

If YES,reference:_____

12.Does the proposal contain characters with any special properties such as

control function or similar semantics? No

If YES,describe in detail (include attachment if necessary)

13.Does the proposal contain any Ideographic compatibility character(s)? No

If YES,is the equivalent corresponding unified ideographic character(s) identified?

If YES,reference:_____
